Hard Surface Maintenance & Repair

TIME IS MONEY

BURNISH, STRIP, SCRUB OR POLISH. Hard floor maintenances can be time consuming, but Sanitaire knows you have no time to waste. Next time you're cleaning a hard surface, make it easy on yourself. Try a Sanitaire. We offer five floor machines and three air movers to fit any size job. From the lightweight, 12-Inch Floor Machine with adjustable handle to our High Performance Burnisher and 17-Inch Dual Speed Floor Machine, we build high performance cleaning, ease of use, simple maintenance and time saving features into all Sanitaire products.

NO TIME TO WASTE WITH HARD SURFACE CLEANING

High-quality components and steel housings better absorb vibration for smoother operation.

Non-marking bumpers ensure damage-free hard surface cleaning.

TACKLE BIG CLEANING JOBS. Our single-motor, 17-Inch Floor Machine with steel housing takes on tough jobs but makes them easy on you. This machine delivers aggressive scrubbing, stripping, buffing and polishing power as well as intuitive operation and less vibration.

WIN THE RACE AGAINST TIME. When you're up against the clock, take on even more hard-surface cleaning with our all-steel 17-Inch Dual-Speed Floor Machine. It is designed with a 3-idler gear box and steel housing to reduce noise and vibration and to quickly and quietly clean large spaces. The fold-down handle makes it easy to ship and can help reduce inventory costs. A safety shut-off switch on the handle helps protect users from mishaps.

Our 20-Inch Floor Machine quickly cleans large floor spaces with its wide diameter surface, built-in durability and quiet, low-vibration operation. Offering the same high performance cleaning and features of our 17-Inch Floor Machine, this floor machine brings proven Sanitaire time savings to large jobs.

Both feature a rugged steel housing to protect the motor and rubber bumper guards to protect walls.

COMPACT, YET POWERFUL. When you need a floor machine for cleaning smaller, confined areas, check out the compact yet powerful cleaning features of the 12-Inch Floor Machine. With a smaller footprint and adjustable telescopic handle, this portable, versatile floor machine is ideal for hotels, food service and government cleaning applications.

SAVE DRYING TIME, TOO. When the cleaning is over and it's time to dry, our three air movers offer the perfect complement to our floor machines. Our two 3-speed high velocity air movers come in a compact integrated handle version or one with a telescopic handle for portability. In addition, our 3-speed Precision Air Mover offers four drying positions and the capability to daisy-chain up to four units on one 15-amp circuit. Its axial fan pulls in air from above for the driest air.
